HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

SCIENTIFIC TRANSLATION EDITOR:
R. C. GLASS, M.A., M.Sc.,
The City University, London

Translators: D. E. BROWN, H. ZAHAVI and E. L. SHORT

Publishing and Advertising Office:
Pergamon Journals Ltd., Headington Hill Hall, Oxford, OX3 0BW

Subscription Rates
Annual Institutional subscription rate (1987) DM 1960.00
2-year Institutional rate (1987/8) DM 3724.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year. Prices are subject to change without notice.

Subscription enquiries from customers in America should be sent to:
Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A.,*
and for the remainder of the world to:
*Pergamon Journals Ltd., Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

VOLUME CONTENTS

VOL. 25, NO. 1 CONTENTS 1985

Translation of Number 1

YU. M. NECHEPURENKO 1 Numerical stability of the marching technique

A. G. PEREVOZCHIKOV 7 Direct methods of calculating optimal programs in dynamic problems of vector optimization

M. I. SUMIN 15 The sufficient conditions regarding the elements of minimizing sequences in optimal control problems

M. G. KLEPIKOVA 21 The stability of lexicographic optimization problems

O. A. ZABOYEVA, S. G. TIMOKHIN and A. V. SHAPKIN 29 The search for optimal guaranteed solutions of high-dimensionality problems of semi-infinite programming

A. A. SHANANIN 34 Study of a class of profit functions arising in a macro description of economic systems

N. V. YUVCHENKO 42 On an explicit method of solving a system of linear differential equations

A. A. ARSEN'EV 52 Some estimates of the solution of Vlasov's equation

YU. I. KHUDAK 57 On the minimum of the mean value of the working damping functions for a stepped system

B. L. ROZHDESTVENSKII and I. N. SIMAKIN 63 Modelling turbulent flows in a plane channel

V. L. MATROSOV 79 The capacity of polynomial expansions of a set of algorithms for calculating estimates

Short Communications

KH. D. IKRAMOV 87 On the comparative magnitude of Gaussian growth coefficients for mutually inverse matrices

L. L. KOSACHEVSKAYA, V. V. ROMANOVTSEV and I. E. SHPARLINSKII 89 On one sequence of iteration parameters

A. V. BAEV 93 On the solution of an inverse problem for the wave equation with the help of a regularizing algorithm

R. DZH. BABAEV 98 The construction of test problems in integer-value programming with binary unknowns

AN. V. LUKSHIN 102 On a property of the collision integrals

Translation of Number 2

V. S. ZHIROV 105 Search for the global extremum of a polynomial on a parallelepiped

P. A. DOROFEYEV 117 On some properties of the generalized gradient method

N. S. VASIL'EV 123 Minimum search in concave problems, using the sufficient condition for a global extremum

G. P. ASTRAKHANTSEV 129 Numerical solution of mixed boundary value problems for second-order elliptic equations in an arbitrary domain

V. K. GORBUNOV 136 Reduction of linear integral equations with a uniform error in the right-hand side

E. B. IPATOV, D. S. LUKIN and E. A. PALKIN 144 Numerical methods of computing special functions of wave catastrophes

G. A. SERËGIN 153 Variation-difference schemes for problems in the mechanics of ideally elastoplastic media

OL.
25
985

V. I. GRYN' 165 Different P_N-approximations of the method of spherical harmonics

M. V. UREV 175 An algorithm for the numerical extension of a generalized axially-symmetric potential from the symmetry axis

A. A. ALEKSANYAN and YU. I. ZHURAVLEV 185 An approach to the question of constructing effective recognition algorithms

Short Communications

G. A. SAVINOV 190 Determination of the extremal eigenvalues by the minimization of special functionals

A. G. SUKHAREV 193 The equality of errors in classes of passive and sequential algorithms

V. N. GLUSHKOV and A. YA. TSAUNE 196 Unconditional minimization in eigenvalue problems with additional stipulations

B. IMOMNAZAROV 199 Approximate solution of integro-operator Volterra equations of the first kind

V. V. KRAVTSOV and P. K. SENATOROV 202 Antenna potentials in problems of diffraction by a transparent body

I. N. NAUMOVA and YU. D. SHMYGLEVSKII 206 On the streamlines of helical flow

VOL. 25, NO. 2 CONTENTS 1985

Translation of Number 3

A. V. MITIN 1 Linear extrapolation in an iterative method for solving systems of equations

V. I. GRYN 7 The stability of a matrix version of flow pivotal condensation

YA. A. AL'BER and S. V. SHIL'MAN 13 General non-asymptotic estimates of the rate of convergence of iterative stochastic algorithms

A. S. NEMIROVSKII and YU. E. NESTEROV 21 Optimal methods of smooth convex minimization

E. Y. BIDAIBEKOV and V. G. ROMANOV 30 Some inverse problems of magneto-telluric sounding for obliquely incident plane waves—I

A. S. IL'INSKII and M. M. MUTALLIMOV 38 A spectral method of calculating the propagation constants of cellular waveguides

A. G. PAVEL'EV 45 Analytic and numerical solution of Fredholm's equation of the first kind arising in the inverse refraction problem

M. B. ORAZOV 52 Localization of the spectrum in the problem of normal oscillations of an elastic shell filled with a viscous incompressible fluid

V. V. VARLAMOV 58 The scattering of internal waves by the periphery of an elastic plate

B. N. CHETVERUSHKIN and E. V. SHIL'NIKOV 64 An algorithm for calculating two-dimensional problems of gas dynamics in Lagrangian variables

A. E. KOROLEV and V. E. YANITSKII 70 Development of a statistical method of particles for problems in the relaxation of chemically reacting gas mixtures

A. V. TIKHONRAVOV 77 Amplitude-phase properties of the spectral coefficients of laminar media

Short Communications

A. V. LOTOV 83 An estimate of the stability of a set of solutions for systems of linear equalities and inequalities

N. I. BELAYA and V. V. IVANOV 87 Reproduction algorithms that are of optimal accuracy for derivatives of certain classes of functions

V. V. DEMCHENKO and V. D. MARKIN 91 On one family of exact solutions of the multidimensional non-linear heat equation

VOL 25 198

Yu. A. Eremin, O. A. Lebedev and A. G. Sveshnikov — 95 — The use of multipole sources in the method of non-orthogonal series in diffraction problems

A. Yu. Dem'yanov, A. M. Orekhov and A. V. Panasenko — 98 — An implicit difference scheme for calculating non-stationary viscous flows with regions of strong non-uniformities

Translation of Number 4

V. V. Repyakh — 101 — An analysis of the modified exclusion method in certain problems

F. P. Vasil'ev — 106 — The regularization of certain methods of minimizing of high order when the initial data are inaccurate

A. Yu. Eremin, I. E. Kaporin and M. K. Kerimov — 111 — The calculation of the Riemann zeta-function in the complex domain

A. E. Korobochkin, N. A. Marchenko and A. Kh. Pergament — 119 — Algorithms of increased accuracy for solving integral equations of the first kind

V. N. Orlov — 125 — The simplification of singularly-perturbed equations of macrodynamics and the method of quasistationary concentrations

E. Y. Bidaibekov and V. G. Romanov — 133 — Some inverse problems of magneto-telluric sounding for obliquely incident plane waves—II

E. Ya. Khruslov — 142 — One-dimensional inverse problems of electrodynamics

V. N. Koshparenok, P. N. Melezhik, A. E. Poedinchuk and V. P. Shestopalov — 151 — Spectral theory of two-dimensional open resonators with dielectric inserts

V. A. Zharov — 161 — Asymptotic theory of open unstable telescopic resonators with an active medium

S. M. Ermakov and V. V. Karyukin — 168 — Two-group optimization of the method of statistical modelling of the radiation field for hydrogen-containing media

V. N. Golubkin and V. V. Negoda — 176 — Numerical calculation of the non-equilibrium flow around a wing in the thin shock-layer approximation

Short Communications

A. B. Vasil'eva and V. T. Volkov — 182 — Periodic solutions of some singularly-perturbed equations of the parabolic type

V. N. Samokhin — 186 — On a laminar mixing layer at the boundary between two flows

T. I. Bukharova and T. I. Savelova — 189 — An approximate solution of an inverse diffraction problem

V. F. D'yachenko — 193 — On calculations in the problems of a collision-free plasma

I. M. Sobol' — 197 — Modelling of one class of densities

A. O. Alekseev — 200 — A multivariant travelling-salesman problem

A. I. Koryakin — 201 — Letter to the Editor

F. G. Cheremisin — 202 — The Second All-Union Conference on Numerical Methods for Solving Kinetic Equations

VOL. 25 1985

VOL. 25, NO. 3 CONTENTS 1985

Translation of Number 5

A. V. Ivanisov and V. K. Polishchuk — 1 — A method of finding the roots of polynomials which converge for any initial approximation

M. V. Aref'eva — 7 — The optimality of regularizing algorithms for solving stochastic operator equations

S. M. Yermakov and A. A. Zhiglyavskii — 15 — The Monte-Carlo method for estimating functionals from eigenmeasures of linear integral operators

E. R. AVAKOV — 24 — Extremum conditions for smooth problems with equality-type constraints

V. YA. ARSENIN, G. D. VASIL'KOV and V. P. ZAGONOV — 33 — A numerical method of solving a two-dimensional problem for Maxwell's equations

ZH. N. KUDRYASHEVA — 39 — Estimation of the influence of the magnitude of inertia terms in problems of water quality

S. A. GABOV — 47 — The solution of a problem of stratified fluid dynamics and its stabilization as $t \to \infty$

I. A. CHEGIS — 55 — An asymptotic formula for the potential of a short cylinder

YU. N. GRIGOR'YEV and A. N. MIKHALITSYN — 62 — Numerical investigation of isotropic relaxation in a gas with Maxwellian interaction

M. M. KOVALËV and N. N. PISARUK — 72 — Independent flows with a discrete-concave expenditure function

Short Communications

YU. L. GAPONENKO — 81 — The accuracy of the solution of a non-linear ill-posed problem for a finite error level

B. B. POKHODZEI — 85 — Modelling of a negative binomial distribution using the sampling method

N. S. VASIL'EV — 87 — On the properties of a flow polyhedron and their applications in the numerical solution of extremal problems on graphs

I. V. MEL'NIKOVA and A. YU. FREIBERG — 90 — Regularization of a boundary value problem for an oscillation equation

V. V. RYKOV — 94 — Numerical modelling of the non-stationary flows of a viscous incompressible fluid

Translation of Number 6

B. M. MUKHAMEDIYEV — 98 — A numerical method for the multistep problem of taking decisions under conditions of uncertainty

I. I. GASANOV and A. D. RIKUN — 105 — The necessary and sufficient conditions for single extremality in non-convex problems of mathematical programming

L. V. ANAPOL'SKII — 113 — The stability of difference schemes

V. B. ANDREYEV — 122 — The point–source function of Dirichlet's problem for the Laplace net operator in an angle of $3\pi/2$ and its application

G. V. MELADZE and D. V. POTSKHISHVILI — 128 — The convergence of the conservative differential–difference scheme of gas dynamics in Euler coordinates

R. P. FEDORENKO and R. M. YUSUPOV — 134 — A solution of the problem of maximizing oil output in conditions of two-phase porous flow

S. A. GABOV and KH. MARIN ANTUN'YA — 143 — Equation of two-dimensional waves in a compressible rotating fluid and the difffraction problem

A. R. MAIKOV, A. G. SVESHNIKOV and S. A. YAKUNIN — 149 — Mathematical modelling of a microwave plasma generator

B. V. ALEKSEYEV and I. T. GRUSHIN — 157 — Existence and uniqueness of the solution of the linearized Boltzmann equation in the case of inelastic collisions

S. P. RADEV, S. K. STEFANOV and V. E. YANITSKII — 168 — Statistical simulation of the recondensation processes in the presence of a neutral gas

V. P. KOROBEINIKOV, B. V. PUTYATIN and A. K. SHARIPOV — 176 — Numerical study of a point explosion in a radiating gas

Short Communications

A. S. LEONOV — 181 — Approximate calculation of a pseudoinverse matrix using a generalized discrepancy principle

S. V. KHABIROV — 182 — Third-order evolution equations connected with the Korteweg–De Vries equation and a linear equation

VO
2
19

Yu. V. Eliseyeva and Ya. M. Zhileikin 187 Calculation of the radiation pattern of a low-frequency sound source

S. P. Popov and G. M. Fedorov 191 The complex structure of a two-dimensional thermal wave absorbing laser radiation

V. G. Volostnikov, M. V. Klibanov and V. V. Kotlyar 192 The uniqueness of an inverse scattering problem in Fresnel's approximation

VOL. 25, NO. 4 CONTENTS 1985

Translation of Number 7

A. G. Zarubin 1 The rate of convergence of projection methods in the eigenvalue problem for equations of special form

E. I. Filippovich 7 The effect of rounding errors in iterational processes

F. V. Lubyshev 13 The convergence of difference approximations and the regularization of optimal-control problems for elliptic equations

I. A. Blatov and V. V. Strygin 25 The convergence of Galerkin's method for a non-linear two-point singularly perturbed boundary value problem in $C[a, b]$ space

I. P. Boglayev 30 Numerical integration of a singularly perturbed Cauchy problem for an ordinary differential equation

V. A. Novikov and E. A. Novikov 39 A method of increasing the efficiency of algorithms for integrating ordinary differential equations by monitoring the stability

M. M. Ad'yutov and A. P. Mikhailov 44 Unbounded invariant solutions of a quasilinear parabolic equation having the property of self-focusing

S. V. Khabirov 49 Classification of the first-order Beklund transformations for third-order evolution equations with a constant separant

M. Gadoev 56 Convergence of the particle method for a two-dimensional set of Vlasov equations

M. A. Volkov 61 A numerical method of solving the problem of maximizing the torsional rigidity of a bar

V. V. Aristov and E. M. Shakhov 67 The motion of a rarified gas caused by a powerful point discharge of a finite gaseous mass

T. V. Plokhonina 74 On the ill-posed nature of the algebraic closure of the second power of a set of algorithms for calculating estimates

Short Communications

V. A. Morozov and N. I. Mchedlishvili 79 On a fast algorithm for the approximate solution of the discrete Wiener–Hopf equation and an estimation of the accuracy

Yu. A. Kriksin 84 The choice of regularization parameter when solving a linear operator equation

V. V. Bulan and G. T. Golovin 88 An approach to the numerical calculation of the magnetostatic characteristics of a system under skin-effect conditions

I. G. Dyad'kin 91 An algorithm for modelling a normal distribution

D. S. Filippychev 93 A method of solving the hybrid model of a collision-free plasma

Yu. I. Mokin 97 Integral equations in the theory of the skin effect

A. R. Ashurov 98 The completeness of a family of estimate-computing algorithms with continuous initial data

Translation of Number 8

A. R. Danilin 102 Order-optimal estimates of finite-dimensional approximations of solutions of ill-posed problems

V. B. Bistritskas 107 Approximate solution of the equations of dynamic programming

O. A. Shcherbina 114 Local algorithms for block-tree problems of discrete programming

VOL.
25
1985

A. F. Vornon and A. I. Khisamutdinov 121 The Monte-Carlo method with additional random sampling for calculating particle flux "at a point"

A. I. Tolstykh 127 Non-symmetrical three-point difference schemes of the fourth and fifth orders

V. F. Kuropatenko 134 Local conservativeness of difference schemes for the equations of gas dynamics

G. V. Alekseyev and A. Yu. Chebotarev 143 Inverse problems of the acoustic potential

L. V. Kuz'mina and I. D. Rodionov 150 The solution of Hartree-type sets of equations by the parameter evolution method

V. V. Kulinich and S. F. Morozov 157 The convergence and stability of a difference scheme for the solution of a multidimensional non-stationary transport equation

G. T. Golovin 163 The accuracy and efficiency of different methods of solving stationary self-consistent problems

L. V. Maslovskaya and A. P. Filippovich 173 The semimixed finite element method in problems of the deformation of shallow shells

Short Communications

I. P. Mysovskikh 180 Quadrature formulae of the highest trigonometric degree of accuracy

P. N. Vabishchevich 185 Variational penalty method in interpolation and smoothing problems on an arbitrary mesh of observations

Nguen Buong 187 On solutions of Hammerstein's equation in Banach spaces

E. M. Konurbaev 190 Method for seeking effective equilibrium situations in n-person differential games

I. V. Lebed' 193 Calculation of the transport factors of a rotationally excited gas

I. M. Israilov 196 Estimate-computing expressions in algorithms with complex systems of support sets

E. N. Gordeyev and V. K. Leont'ev 199 The complexity of the tabulation of trajectory problems

VOL.
25
1985

VOL. 25, NO. 5 CONTENTS 1985

Translation of Number 9

V. A. Bushenkov 1 An iteration method of constructing orthogonal projections of convex polyhedral sets

B. D. Duisebayev 6 A method of solving bilinear minimax problems

I. S. Men'shikov and O. R. Men'shikova 14 Strong equilibrium situations and the N-nucleolus in games with a hierarchical vector of interests

T. S. Akhromeyeva and G. G. Malinetskii 20 Periodic modes in nonlinear dissipative systems near a bifurcation point

O. Ya. Savchenko 29 The definition of a region, inside which there is an eigenvalue of a differential equation

S. A. Voitsekhovskii, V. L. Makarov and T. G. Shablii 36 The convergence of difference solutions to the generalized solutions of the Dirichlet problem for the Helmholtz equation in a convex polygon

N. V. Muzylev 43 The uniqueness of the solution of an inverse problem of nonlinear heat conduction

A. D. Dzhavadyan and L. A. Oganesyan 47 Choice of the net depending on the properties of the boundary in the variational-difference method for solving elliptic equations

M. Ya. Ivanov and V. V. Koretskii 56 Calculation of flows in two- and three-dimensional nozzles by the approximate factorization method

V. A. KAZAKOV — 68 Strongly implicit alternately-triangular method for solving problems of asymptotic boundary-layer theory

N. V. POGORELOV and YU. D. SHEVELEV — 74 Explicit–implicit cruising method for computing supersonic flow past a body

L. G. VOLKOV — 80 On conservation laws in one-dimensional magnetohydrodynamics in the case of infinite conductance

Short Communications

V. LANG — 86 Effective algorithms for solving the eigenvalue problem

E. V. CHERNOKOZHIN and U. V. SHESTOPALOV — 89 A method of calculating the characteristic numbers of a meromorphic operator-function

A. ZEMLA — 92 A fundamental solution of a lattice approximation of a Helmholtz operator

U. M. DAVYDOV — 96 Different forms of approximation dispersion matrices of difference schemes

S. A. ABRAMOV — 99 Separation of variables in rational functions

A. S. DZYUBA — 103 Mean deviation of the frequency of incorrect recognition from probability

Translation of Number 10

G. M. VAINIKKO — 107 Estimates of the error of regularization methods for normally solvable problems

M. K. KERIMOV and S. L. SKOROKHODOV — 117 Calculation of the complex zeros of a Bessel function of the second kind and its derivatives

L. G. GURIN — 129 Control of a dynamic system when a random process acts on it

V. G. PRIKAZCHIKOV and A. N. KHIMICH — 137 The eigenvalue difference problem for the fourth order elliptic operator with mixed boundary conditions

A. A. REZNIK, V. S. RYABEN'KII, I. L. SOFRONOV and V. I. TURCHANINOV — 144 The algorithm of the method of difference potentials

V. I. GRYN' — 151 On inverse diagnostic problems of the dynamics of a radiating gas

T. G. ELIZAROVA and B. N. CHETVERUSHKIN — 164 Kinetic algorithms for calculating gas dynamic flows

V. V. KRASNOPROSHIN and V. A. OBRAZTSOV — 169 Two-level models of recognition algorithms

A. M. SLIN'KO — 178 Some algebraic operations over classification algorithms and applications

Short Communications

K. S. DEMIRCHYAN, YU. P. KIZIMOVICH and YU. V. RAKITSKII — 183 An approach to splitting matrices

I. K. DAUGAVET — 186 On stability in Gavurin's sense of approximate methods for solving systems of functional equations

V. D. MATVEYENKO — 186 A method for constructing optimal trajectories of a one-product controlled dynamic system

V. V. VARLAMOV — 187 On a problem of the propagation of compression waves in a viscoelastic medium

V. P. MAIER and S. V. SOKOLOV — 191 Study of difference schemes for finding the water saturation in the two-dimensional model of porous flow

V. A. GONCHAROV — 195 On the realization of a numerical method for solving the convection problem for a weakly compressible fluid

V. P. PASHCHENKO — 197 A numerical method of computing interior subsonic ideal gas flows with a twist

OL.
25
985

Translation of Number 11

1 Mathematicians call for halt to the arms race

A. V. Antonets — 1 Simple approximations of functions with additional conditions

L. A. Onegov — 8 An extremal problem of the approximation of integrals with fixed singularity in the class W^rL_2

G. A. Mikhailov — 18 Investigation and reduction of the variance of weight-vector algorithms of the Monte-Carlo method

M. K. Kerimov and S. L. Skorokhodov — 26 Calculation of the complex zeros of Hankel functions and their derivatives

I. A. Asnis, A. V. Dmitruk and N. P. Osmolovskii — 37 Solution of the problem of the energetically optimal control of the motion of a train by the maximum principle

M. F. Kaspshitskaya, I. V. Sergienko and A. I. Stiranka — 44 A special class of problems of geometric optimization

A. O. Alekseyev, O. G. Alekseyev, V. G. Anisimov and E. G. Anisimov — 50 The use of duality to increase the effectiveness of the branch and bound method when solving the knapsack problem

A. V. Tikhonravov — 55 The synthesis of laminar media with specified amplitude and phase properties

S. A. Gabov and Yu. D. Pletner — 64 An initial-boundary value problem for the gravitational–gyroscopic wave equation

V. I. Mazhukin and G. A. Pestryakova — 69 An algorithm for the numerical solution of the problem of the surface vaporization of a substance by laser radiation

Short Communications

V. Ya. Tereshchenko — 78 The solution of the problem of minimizing generalized Treffetz functionals as a variational problem with constraints

R. Menzel — 83 A method for the numerical determination of multiple bifurcation points in the finite-dimensional case

V. A. Antonchik — 88 A numerical method of solving the Cauchy problem for stiff systems

S. A. Voitsekhovskii, V. L. Makarov and V. N. Novichenko — 90 Estimation of the rate of convergence of difference schemes for quasilinear elliptic equations of the fourth order

V. N. Koterov and V. E. Prigarin — 93 Calculation of dynamically equilibrium states of gas flow for volume impulse heat supply

E. N. Amirgaliev and A. F. Mukhamedgaliev — 95 An optimization model of classification algorithms

Sh. I. Galiev — 99 Determination of suboptimal solutions of maximin problems

P. A. Dorofeyev — 100 The stability of a method of searching for saddle points

Translation of Number 12

M. K. Kerimov and S. L. Skorokhodov — 101 Calculation of the multiple zeros of the derivatives of the cylindrical Bessel functions $J_\nu(z)$ and $Y_\nu(z)$

N. S. Kukushkin, I. S. Men'shikov, O. R. Men'shikova and N. N. Moiseyev — 108 Stable compromises in games with lattice payoff functions

V. R. Khachaturov — 117 A combinatoric–approximation method for the decomposition and composition of systems, and finite topological spaces, lattices, and optimization
